

U.S. Marine Corps (USMC)
 Capabilities Development
 Directorate for Technical and
 Operational Support
 Services (TOSS) IDIQ

CDD TOSS IDIQ

The Deputy Commandant, Combat Development and Integration (DC, CD&I) prepares the Marine Corps through identifying and facilitating fielding of warfighting capabilities. The Capabilities Development Directorate (CDD) is responsible for developing and integrating warfighting capabilities solutions that provide for an effective, integrated Marine Air Ground Task Force capability and future capabilities supporting the Marine Littoral Regiment. The Marine Corps Warfighting Laboratory/Futures Directorate (MCWL/FD) generates and examines threat-informed, operating concepts and capabilities, and provides analytically supported recommendations to inform subsequent force design and development activities.

The first IDIQ awarded by CDD/CD&I focused on a requirement for technical, analytical, and engineering, and capability portfolio management (CPM) support. Due to the success of the former IDIQ, this new Technical and Operational Support Services (TOSS) IDIQ was recompeted to include operational architecture support in support of CDD/CD&I and warfighting capability analysis in support of MCWL/FD.

Contract Number:
 M0026423D0008

Period of Performance:
 9/8/2023 – 9/7/2028

Aggregate ceiling value:
 \$99,391,488

TASK AREAS

- Task 1: Technical Support
- Task 3: Integration Support
- Task 5: Operational Support
- Task 2: Planning & Analysis Support
- Task 4: Business Support

OUR TEAM

OUR TEAM STRENGTHS

- ✓ Our Team prepares concepts that describe the future operating and information environments, current and existing challenges, and the capabilities required to ensure rapid receipt, analysis, distribution, and safeguarding of data.
- ✓ Our Team promotes interoperability and seamless integration across Marine Corps systems and platforms providing Data Analytics and Decision Support Tools, aiding in the CDD's role in capabilities-based assessment and MCWL's operational analysis.

AMSG'S PROVEN EXPERIENCE

As a Prime Contractor, AMSG provides technical and analytical support services to the Marine Corps Combat Development Command (MCCDC) on multiple contracts. These tasks support combat capability development processes and analysis services to the DC CD&I, CDD by providing technical, analytical and SME support – to include specialized analysis and support for the development of comprehensive Joint Capability Integration and Development System (JCIDS) documents.
